Youssef Mohamed

Cyber Security Engineer

youssefmohamed4569@gmail.com +20 100 623 6237 Egypt

PROFILE

Results-driven Cyber Security Engineer and Computer Engineering graduate with 6 months of hands-on internship experience at Cyber Force. Ranked in the **top 3% globally on TryHackMe**, combining offensive skills in penetration testing and ethical hacking with defensive capabilities in SOC operations, SIEM (Splunk, QRadar), threat detection, and incident response. Proven problem-solver across TryHackMe, Hack The Box, PortSwigger, and LetsDefend, ready to uncover vulnerabilities, reduce risk, and strengthen secure, resilient systems from day one.

PROFESSIONAL EXPERIENCE

Cyber Force 6 Months

Cybersecurity Intern

- Completed an intensive 6-month cybersecurity internship, turning academic and lab-based training into practical experience in a professional security environment.
- Worked alongside cybersecurity professionals, gaining real-world exposure to industry security practices and team workflows.

EDUCATION

King Salman International University 2021 – 2026

Bachelor of Computer Engineering - Cyber Security

Graduated 2026

TECHNICAL SKILLS

Offensive Security — Penetration Testing | Ethical Hacking | Vulnerability Assessment | Web Application Security (SQLi, XSS, SSRF) | Privilege Escalation | Lateral Movement | Post-Exploitation

Security Operations (SOC) — SIEM (Splunk, Splunk Enterprise Security, QRadar) | Log Analysis | Alert Triage | Threat Detection | Threat Intelligence

Incident Response & Forensics — Incident Response | Digital Forensics | Malware Analysis | Endpoint Protection

Network Security — Firewall Configuration | IDS/IPS | VPNs | Secure Network Design | BGP | OSPF | IS-IS | VLANs | VXLAN

Security Foundations — Risk Assessment | Cryptography | PKI | Identity and Access Management

Programming & Platforms — Python | C++ | MySQL | Windows | Linux

CERTIFICATIONS

- Jr Penetration Tester - PT1 (TryHackMe)
- Cyber Threat Intelligence 101 Analyst (arcX)
- Cryptography (Northwestern University)
- Log Analysis Basics (Cybrary)
- Splunk Certification
- SIEM Basics (Splunk)

PROFESSIONAL TRAINING

Netriders Academy, *Diploma in Cyber/Computer Forensics and Counterterrorism*
- Conducted threat intelligence analysis and comprehensive security assessments.
- Designed secure networks and implemented PKI to protect communications.
- Managed identity and access controls and supported incident response.

Huawei HCIE-Routing & Switching
- Mastered advanced routing (BGP, OSPF, IS-IS) and switching technologies (VLANs, VXLAN).
- Configured Huawei routers, switches, and firewalls, focusing on VPNs and intrusion prevention.

AMIT Learning, *Diploma in Cybersecurity*
- Built strong foundations in network security, digital forensics, and SIEM (Splunk, QRadar).
- Developed expertise in endpoint protection, threat intelligence, and cyber incident analysis.

CAPTURE THE FLAG (CTF) ACHIEVEMENTS

TryHackMe, *Consistently ranked in the top 3% globally among millions of users, completing numerous rooms and challenges across:*
- Web Exploitation
- Forensics
- Network Exploitation
- Privilege Escalation
- Malware Analysis

Hack The Box, *Solved multiple Easy, Medium, and Hard machines, demonstrating proficiency in:*
- Initial Footholds
- Lateral Movement
- Post-Exploitation
- Advanced Exploitation Techniques

PortSwigger Web Security Academy, *Completed a wide array of hands-on labs targeting web application vulnerabilities, including:*
- SQL Injection
- Server-Side Request Forgery (SSRF)
- Cross-Site Scripting (XSS)
- Authentication Bypass

LetsDefend, *Tackled blue team scenarios and incident response challenges, sharpening skills in:*
- Log Analysis
- Threat Detection
- Alert Triage
- Digital Forensics
